

MAGTEC UK's **largest supplier** of hybrid and electric drive systems

Special vehicle applications:

- **Magtec** has almost two decades experience in developing drive systems for the most demanding military, aerospace and commercial applications.
- **Magtec** developed the complete drive train systems for the UK MoD 6x6 and SEP wheeled vehicle programmes including:
 - In hub wheel motors with 2-speed gearbox and brake system
 - Dual generator systems
 - Power distribution and control systems
 - Driver interfaces
- For the SEP programme **Magtec** also developed, installed and tested all the vehicle software including power scheduling, traction control, electronic diff lock and pivot turn functions
- **Magtec** also developed systems for the SEP tracked vehicles
- These systems meet all the required military specifications for EMC and environment conditions
- **Magtec** has also developed drive systems for similarly demanding applications in the aerospace and marine markets
